Medical Equipments

SANA Double Thread Universal Pedicle Screw

Features & Benefits	Curved locking washer to Enhance Contact Surface Between Rod and Lock Washer. Double-lock Nut to Lock the Screw Body to the Screw Head and Rod to the Screw Separately. Suitable for Stabilization of Lumbar-Thoracic Column , Particularly in Treatment of Spinal Scoliosis Manufactured from High Mechanical Strength of Titanium Alloy (Ti6Al4V-ELI). Advanced Enhancement High Pullout Resistance Thanks to Variable Core Design for Bone Specific Anchorage and Double-Lead Thread for Fast Insertion Self -Tapping Threads Double Thread Enable Secure Anchorage in Cancellous Bone Double Thread Pattern Ensures Pull-out Strength Colure Coding Implant Easy Identification
Diameter	Polyaxial screws are Available in Various Diameters , Typically Ranging from4.5,5,5.5,6,6.5,7.5mm
Length	The Length of Polyaxial Screws Can Range from 25mm to 60mm

Porous Interbody Fusion Cages

Fully Interconnected Porosity to Promote Bony on-Growth and in-Growth
Optimum Elasticity Modulus Avoids Stress Shielding and Bone Resorption
Manufactured from Implantable Titanium Alloy (Ti6Al4V-ELI)
Reduced Density to Enhance Intraoperative and Postoperative Imaging
Anatomic Design
